

Does your construction software measure up?

Or is your ERP software slowing you down?

Asset owners and stakeholders demand ever more from both your construction projects and your day-to-day operations. To remain competitive, your software must be built to meet your business requirements—providing a seamless, positive experience that keeps you compliant, sustainable and in-line with modern construction methods. Is your ERP software stifling your transformation and growth?

Potential vendor issues?

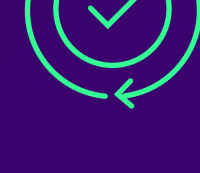

#1 No Roadmap

Does your vendor have a clear roadmap that contains core construction specific functionality, including subcontract management, modern methods of construction and integrated project management?

#3 Casualty of Acquisition

A poor acquisition strategy can quickly leave the products you rely on today out in the cold, and you without key real-time information and a comprehensive view of your full range of projects.

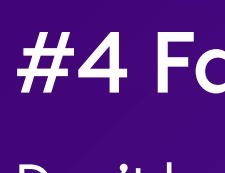

#5 No Lifecycle Support

Is your ERP capable of supporting the full project lifecycle with core construction specific processes as standard?

#2 Disconnected systems

Too many disconnected platforms and Excel spreadsheets make it difficult to ensure your software investment is supporting your transformation journey by hampering the adoption of best practices.

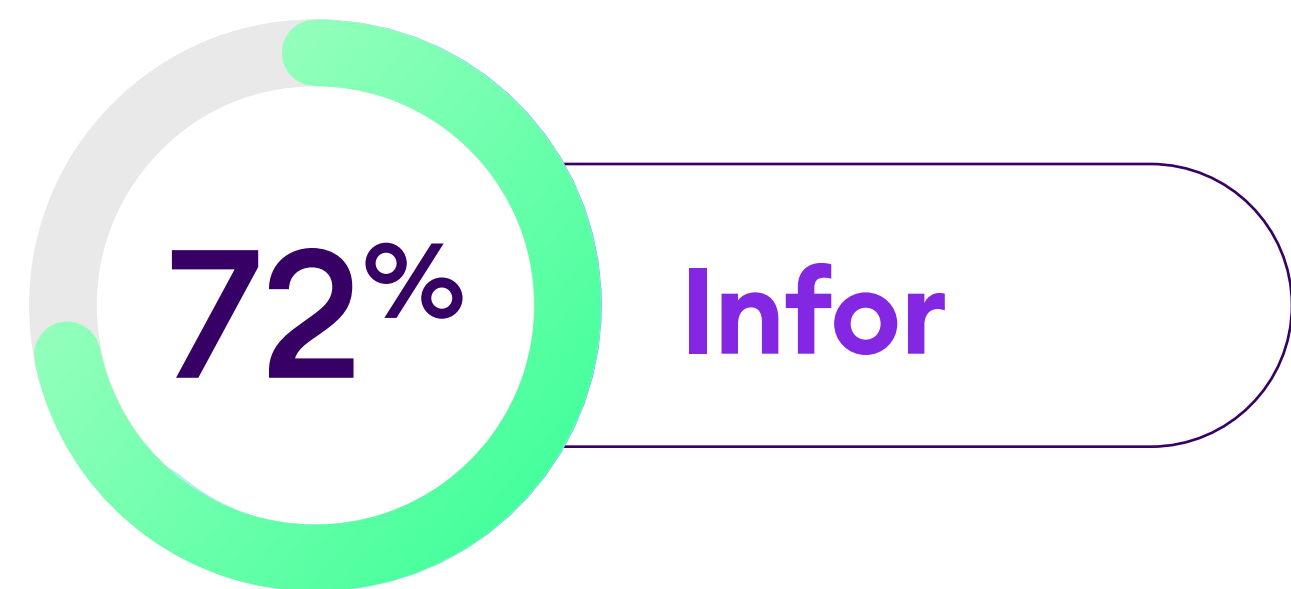

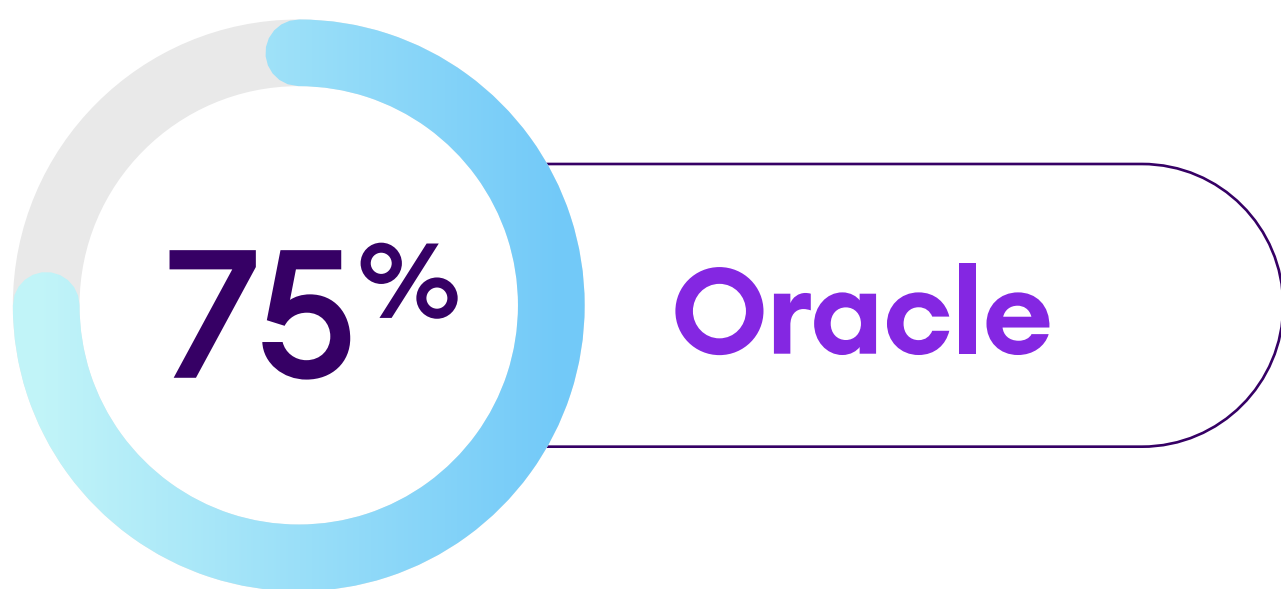

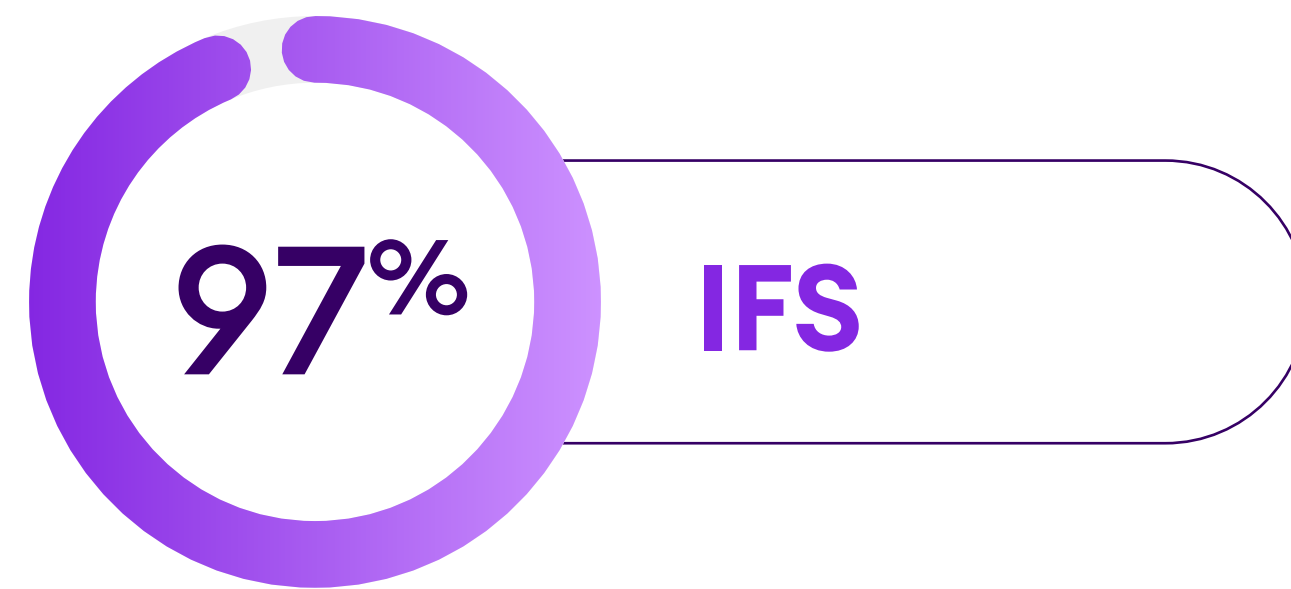

#4 Failed Relationships

Don't be left with an unsupported ERP system and custom development that's too costly to change, upgrade or evolve.

See why customers are more willing to recommend IFS over other major Cloud ERP software products

As of 11 June, 2021 based on 76 reviews in the last 12 months. “Most progressive UI of any ERP application.”

ERP Director

“IFS is a great overall integrated ERP system.”

VP of Operations

“IFS supports the processes that drive our business.”

Manager, Business Integration

“IFS is a trusted partner of our organization.”

VP Information Technology

IFS Cloud for Construction—your way forward

IFS offers project management and asset lifecycle software specifically designed for the engineering, construction and infrastructure industry. Our solution supports the whole asset lifecycle from engineer, make, build and maintain for any type of asset.

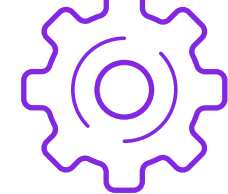

#1 Clear Direction

At IFS we make sure you know what's ahead so you can stay ahead of the curve. Our Statement of Direction sets it all out for you in black and white.

#2 ERP Backbone

Your IFS digital ERP backbone will manage projects, resources, time and value in one system—improving project control, revenue and profit-margins—and reducing your costs. Linking to best of breed tools, if required, while you retain one single view of the truth.

#3 Considered Acquisition

IFS have been on the acquisition trail, it's true—but we haven't purchased competing or conflicting ERP systems. Our focus has been to acquire in order to extend our technology platform so our customers can create and deliver amazing moments of service for their customers.

#4 Relationships that Matter

Can your vendor tell you what they've invested over the last two years in research and development for your product? We can. Plus, IFS Customer Advisory Boards are just one way our customers share industry-specific input into the future development of our software.

#5 Product Lifecycle

IFS customers benefit from a platform and solution that's continuously developed. With IFS Cloud's twice-yearly releases, new features and functionality are quickly available, keeping the impact on your business low, and helping you keep pace with the construction landscape.

Find out why customers have rated IFS higher than other Cloud ERP software products:
