

Projects in IFS Cloud

Deliver complex enterprise projects safely, on-time and on-budget.

Organizations need predictability to deliver complex asset projects. However, supply chain disruptions coupled with the typical delivery challenges present significant ongoing obstacles.

A lack of guaranteed raw materials, longer lead times, increasing supply prices, evolving customer requirements and staff shortages make visibility and control vital to any successful project delivery. In response, leading companies are turning to IFS Cloud to plan, schedule and follow-up ensuring project delivery on-time and on-budget.

Projects in IFS Cloud provides an advanced set of tools tailored for specific industries, guaranteeing smooth and predictable delivery throughout the entire lifecycle.

Benefits

IFS Cloud offers a complete end-to-end solution to help you deliver the most complex of projects.

A single, centralized source of truth
Work with a real time view providing full visibility. Be confident of the status of any project against the Key Performance Indicators (KPIs).

Drive project control
Improve overall control of resources including people, materials, logistics and supplies to keep projects on-track.

Drive more predictable project outcomes
Empower project managers to understand how a project is really tracking against its planned outcomes.

Deliver against the wider strategy
Ensure projects are delivered in-line with the requirements and goals of wider programs or strategic business objectives.

Key capabilities

Sales and Subcontract

Manage customer contracts across the entire sales contract lifecycle from bid to tender, completion and handover.

Engineering and Design

Apply and leverage product data to support engineering design, configuration control and follow up activities such as revision management.

Resource Management

Create and maintain resource structures that generate capacity for planning and execution processes.

Project Planning and Follow-Up

Get support from a comprehensive planning solution delivering a total view of all projects across the enterprise including subsidiaries or wider business entities.

Contract Change Management

Access a complete financial view to track, control and understand changes to contractual agreements.

Project Reporting and Invoice

Accurately track, report and analyze employee time and cost expenses for every project.

Project Financial Control

Control project budgets and forecasting for both cost and revenue.

Risk Management

Capture and analyze project risks. Proactively plan and put steps in place to remove the risk entirely or reduce likely impact.

Project Manufacturing

Plan and execute the project plan using manufacturing processes such as make-to-order (MTO) and configure-to-order (CTO).

Construction and Installation

Utilize a comprehensive solution to design and deliver complex assets specific to the engineer-to-order (ETO) process.

IFS develops and delivers cloud enterprise software for companies around the world who manufacture and distribute goods, build and maintain assets, and manage service-focused operations. The industry expertise of our people and of our growing ecosystem, together with a commitment to deliver value at every single step, has made IFS a recognized leader and the most recommended supplier in our sector.
