

# 5 Reasons to consider IFS Cloud for Energy, Utilities & Resources

## 1. A comprehensive, flexible, and industry-specific solution

With **IFS Cloud**, everything is one integrated enterprise platform – The functional depths of encompassing **best-of-breed asset management**, projects and field service capabilities means that users only ever operate from one single source of truth. Significantly, this means **better performing assets**, balancing of supply and demand, streamlining the supply chain, complying with ever-changing regulations, and increased customer satisfaction.

- In an industry known for fierce competition and reliance on customer satisfaction being paramount, IFS Cloud gives energy, utilities and resource companies their competitive edge to continuously improve their operations.

## 2. Improved workforce planning and scheduling

Change is constant, so your scheduling should also be. For true efficiency and to meet the challenges faced by energy, utilities and resource companies, **IFS enables users to balance competing priorities** with incoming jobs and traffic, while looking for opportunities to combine jobs and planned maintenance.

- In a customer-centric industry any loss of service is unacceptable, IFS can help you keep the lights on... water running... gas burning and so on. Ensuring you only ever deliver the most exceptional service and minimize any downtime.

## 3. Consistent and intuitive user experience

This matters for **two reasons** –

1. **Happy users** that love to use the system record better quality data enabling your organization's leadership to make better strategic decisions.

2. **Consistent user interface** – regardless of whether your team is requesting annual leave or completing a high-profile work order – reduce your training overhead and increase the speed at which new tools are adopted.

- IFS Cloud ensures that your users experience hits these two critical reasons so that you can in turn pass these benefits onto your customers. This will allow you to get projects done quicker and in the most optimal way.

## 4. Optimized asset performance and safety

Whether you are planning or designing your asset, operating and maintaining it, executing a refit or decommissioning, IFS provides a **best-of-breed industry solution** to support your entire asset lifecycle.

- By combining a flexible, native enterprise asset management (**EAM**), field service management (**FSM**), mobile workforce management (**MWM**) and enterprise resource planning (**ERP**) solution tailored to the needs of your industry – you can ensure that you are always in complete control of your operations.

## 5. Meet your sustainability goals

The drive to **net zero** is coinciding with the need to manage and reduce operational costs, while maintaining the reliability, safety, and operation of existing assets. Also, the need to meet new challengers potentially entering the market, **adopting new technologies** and changing consumer demands – provides a perfect storm for not meeting your sustainability goals.

- IFS not only understands these challenges, but actively designs our solutions to allow you to meet their complex and demanding nature by enabling you to become more agile and reactive on demand.
