

# IFS Energy & Resources – Land

Land management software for upstream oil and gas professionals

Land combines real-time visualization, one-click data analysis, and process automation to deliver an unmatched land management experience. Land helps you acquire and protect your organization's most important assets.

## Key product facts

1. Land customers have the ability to manage anywhere from 1,000 to over 500,000 lease agreements.
2. Land is used by over 40 companies every day to manage crucial land and lease tasks.
3. Land is responsible for tens of thousands of ownership transfers every year.
4. Land possesses 40 years of industry experience, a rich history that started as part of IFS Tobin Land Suite.

## Improved efficiencies

- Streamlined management of crucial land and lease tasks
- Intelligent mapping
- Clear visualization of well portfolio for lease analysts to land managers & everyone in between

## Greater value

- Protection of important assets
- Complete automation of your land portfolio
- Maximized revenue opportunities

## Benefits

**Replaces** spreadsheets and manual, error-prone processes with best-in-class software that boasts an intuitive UI built for growth-oriented customers

**Allows** users to remain contractually compliant at all times through real-time views of contractual obligations

**Enables** users to maintain an accurate inventory of acreage, manage critical obligations, and make mass changes to leases

**Offers** users ultimate visibility into leasehold position relative to competitors; net revenue interest for a group of wells, lease extensions, and provisions; and other business data

**Provides** location of Pugh clauses, shut-in provisions, and other obligations

**Allows** oil and gas companies to monitor well portfolios and maximize revenue opportunities through an interactive map that shows what is owned, what is leased, and what remains unleased

# IFS Energy & Resources – Land

## Features

- Real-time, embedded, and interactive map
- One-click data analysis
- Mobile friendly
- Highly configurable
- Integration ready (IFS Energy & Resources products, some third-party applications)
- KPI dashboards and 3,000+ queries

## Integrations and modules

Combine these with Land for increased functionality and an enhanced user experience.

**Land Broker** – Uses mobile technology to reduce the time it takes to acquire, map, and log a lease from months to hours.

**eCalendar** – Land administrators can create online calendars for contract expirations, lease obligations, lease expirations, and other events, and route the calendars for review.
