IFS Merrick — Field Operator
An industry-leading mobile field data capture and operations management solution.

IFS Merrick – Field Operator supports mobile capabilities that simplify the daily challenge of managing large portfolios of wells and equipment and remote operations.

Leading Capabilities
By connecting all key stakeholders in the field and back office, Field Operator allows operators to reduce deferments and improve operational efficiencies by identifying and reporting production problems faster.

Operators enjoy the solution’s simple navigation, interactive route-facility and stop-battery totals, easy-to-interpret graphs, and color-coded variances – all integrated with industry-standard calculations. Field Operator also features an enhanced commentary functionality that connects field and office users by enabling comments with threaded responses making for an effective shift handover log.

Field Operator with Route Surveillance
• Real-time data validation and integration with SCADA
• Seamless collaboration between the field and back office
• Alerts and task assignments

Benefits

Supplies field operators with all the information they need to handle more wells

Supports shift handoffs via commentary across the IFS Merrick suite

Offers one stop setup with IFS Energy & Resources – ProCount and Carte

Includes geofencing and geolocation of prioritized tasks

Captures volumes and other transactions like ESG events, inspections, and maintenance

Configures alerts and tasks for your specific operations: onshore, offshore, conventional, or unconventional

Studies show that with Field Operator, time spent on field data capture and reporting activities can be reduced by 40% or more.
IFS Energy & Resources – Field Operator

Features

• Seamless data capture and validation
• Liquid inventory and run ticket management
• Live Automation/SCADA integration
• Quick access to well tests, run tickets, and other forms from anywhere in the system
• Required fields on forms
• Multiple asset downtime events, put an entire system down
• Stop base, fast, and secure data synchronization
• Reliable in low bandwidth areas
• Alerts, tasks, measurements, and analytics all in one place
• Built-in map
• Fast adoption with low cost of ownership

An industry tradition

Field Operator was created by the same team that developed IFS Energy & Resources – eVIN. Trusted by over 22,000 field operators around the world, with enhancements that drive efficiency.

Built on the same foundation as IFS Merrick, the industry-leading production solution for hydrocarbon accounting and reporting, Field Operator with Route Surveillance saves time when configuring and maintaining assets.

Pumping by exception made possible

When combined with the Route Surveillance capabilities, Field Operator provides operators the insights needed to prioritize tasks and routes. If multiple wells require attention, the solution provides priorities and details based on configurable surveillance rules to support effective decisions.

The solution supports limitless chained alerts and tasks linked to ESG, chemical tracking, inspections, volumetric variances, and more.
