

# IFS

# SAFEGUARDING™

Secure the business value outcomes of your self-managed or partner-led project

IFS

## ENHANCE YOUR PARTNER-LED OR SELF-MANAGED PROJECT WITH A STRUCTURED IFS ENGAGEMENT

As a business embarking on an IFS system implementation, you want to be sure agreed project outcomes will be delivered and that schedules stay on track.

IFS Safeguarding™ provides structured governance and independent validation to monitor progress, ensure best-practices are in place and mitigate issues and risks proactively.

## IFS CUSTOMER SUCCESS

Bringing together proven tools, methodologies and engagement activities, the IFS Customer Success program proactively identifies business growth and opportunity areas, constantly refining your IFS solution to ensure maximum relevance and lifetime value.

Accelerate your solution implementation, assure delivery and fully maximize commercial value throughout the system lifetime with consulting services and components that suit your needs.

## HOW IT WORKS

A subscription based delivery model, backed by the tools and best-practice methodologies available within IFS.

Example IFS Safeguarding™ activities might include:

- Solution assessment
- Technical architecture assessment
- Review of any modifications or non-standard practices
- Code change boards
- Robust governance
- Scheduled access to top experts

## BUSINESS BENEFITS WITH IFS SAFEGUARDING™

IFS Safeguarding™ allows us to enhance your IFS delivery and ensure success.

- **Embed independent professional oversight**  
—benefit from IFS expertise at each critical touchpoint
- **Review the areas of highest risk**  
—IFS experts will verify key milestones, collaborating with the delivery team
- **Agree a schedule of discrete activities**  
—receive invaluable feedback and independent guidance at various points throughout projects
- **Balance business demands with project milestones**—benefit from our experience in completing over 3000 IFS implementations

## THE 7 STANDARDS OF SAFEGUARDING

IFS projects benefit from a structured approach which is divided into seven key areas:

1. **Project governance and communications**
2. **Project controls**
3. **Solution integrity**
4. **Code management**
5. **Technical infrastructure**
6. **Change management**
7. **Operational readiness**

Providing IFS access to all seven standards enables more effective risk mitigation and better proactive guidance, improving the chances of project success
