

# IFS is driving digital transformation in the Construction & Engineering Industry

Discover tangible benefits that our customers achieve thanks to IFS Cloud ERP and EAM software platforms—from real-time data sharing and unified global operations to optimized business processes and simplified reporting

[Read Full Story](#)

It is unacceptable to see that equipment is used rarely or never. IFS will allow us to make this observation and then, by **combining the information collected with the monitoring of worksites** in the solution, to allocate resources and **increase the equipment's time of use.**"

The construction industry has a challenging and highly-competitive market, and **by becoming more data-informed** and being able to **make decisions based on correct data, we will gain better control of our business.** We are confident in IFS Cloud being the right choice for this task and look forward to continuing working with IFS."

A huge optimization benefit for us will be **digitalizing collaboration with our subcontractors** so that they can register hours directly in IFS software. On any construction site we typically have four to five subcontractors, each with hundreds of employees, all of whom must record their working hours. **Time reporting is a very central task** in a project-driven company like ours, so **digitalizing and gaining flexibility in this part of the supply chain is of paramount importance.**"

We had a litany of **spreadsheets filled with duplicated, outdated or inaccessible data.** The existing finance system was at the end of its lifecycle, and simple management reports were taking seven weeks to finalize—we were always playing catch-up. With **immediate access to data across the business, the processing time for management accounts has been cut in half.** The operational overhaul has enabled us to resource more efficiently; **IFS has brought our business processes and reporting systems up to date.**"
